Scope of Work

North Main Street Bollards - Evansville, Indiana

Forty-nine illuminated bollards were installed along North Main Street between Division Street and Morgan Avenue as part of the Jacobsville Complete Streets project in 2017-2018. Since that time, these bollards have experienced ongoing vandalism. The City of Evansville Department of Metropolitan Development seeks bids from a qualified contractor to disconnect the electrical services to these bollards, remove the current acrylic lenses, and cap the bollards with new metal plates.

The city wishes to leave the existing wiring in place to the largest extent possible such that the bollards could potentially be replaced with alternate fixtures in the future. To that end, the contractor shall remove the wiring only from the breakers to the contacts within the lighting control panel for each circuit at each location. In the lighting control panel, contractor shall take the load side wires off, wire nut individually, and tag and label each "disconnected" with the current date. Within the panel, change the bussing, and label each affected breaker as "spare" and date the change on the index.

The city has purchased new metal cap plate assemblies for the 49 bollards and will supply to contractor. The contractor shall remove the existing white acrylic lenses from the bollards using the tool provided, strip the old gasket off the metal bollard, and install new gasket and metal cap plate with the screws provided. Some acrylic lenses are already missing due to vandalism. At these locations, remove any remaining acrylic and gasket. The existing LED lights and wiring within the bollards shall remain unaltered. New metal caps can be installed without conflict with internal elements.

Electrical panel locations:

The 49 bollards are serviced from three electrical service panels located along North Main Street. These panels also feed traffic lights along North Main Street – do not interrupt service to the traffic lights.

Panel 1 is located at 401 N Main Street, northeast corner of Main and Michigan, at the north edge of the parking lot.

- Based on record plans, the bollards are circuits 2, 4, 6, and 8. Verify before disconnecting.

North Main Street Bollards - Evansville, Indiana

Panel 2 is located at 800 N Main St (DaVita Dialysis), northwest corner of Main and Columbia, at the south edge of the parking lot along the sidewalk.

- Based on record plans, the bollards are circuits 2 and 4. Verify before disconnecting.

Panel 3 is located at 1200 N Main St, northwest corner of Main and Louisiana Street, along the sidewalk.

- Based on record plans, the bollards are circuits 2, 4, and 6. Verify before disconnecting.

the utilization of MBE/WBEs and whether there are valid reasons for the bidder's inability to achieve the stated goals; and
